- | | |
|---------------|-------------------|
| (a) Zalen | (b) Ramhual |
| (c) Thirideng | (d) Khawnbawl Upa |

SECTION - B

(50 Marks)

This Section should be answered only on the Answer Sheet provided.

Marks for each question is indicated against it.

1. Write an essay on any **one (1)** of the following: **(20)**
 - Mitigation of man-made Disasters
 - Higher Education Vs. Skill Acquisition
 - Impact of Social Media on Mental Health
 - Effect of Inflation on Low-Income Families
2. Write a précis of the following passage, reducing it to 1/3rd of its original length, and giving it a suitable title. **(10)**

Global warming is a term almost everyone is familiar with. But, its meaning is still not clear to most of us. So, Global warming refers to the gradual rise in the overall temperature of the atmosphere of the Earth. There are various activities taking place which have been increasing the temperature gradually. Global warming is melting our ice glaciers rapidly. This is extremely harmful to the earth as well as its inhabitants. It is quite challenging to control global warming; however, it is not unmanageable. The first step in solving any problem is identifying the cause of the problem. Therefore, we need to first understand the causes of global warming that will help us proceed further in solving it.

These causes are both natural as well as manmade. The natural causes include the release of greenhouses gases which are not able to escape from earth, causing the temperature to increase. After that, the excessive use of automobiles and fossil fuels results in increased levels of carbon dioxide. In addition, activities like mining and cattle rearing are very harmful to the environment.

Global warming can be stopped when combined efforts are put in. For that, individuals and governments both have to take steps towards achieving it. We must begin with the reduction of greenhouse gas. An important step is to monitor the consumption of gasoline. Switch to a hybrid car and reduce the release of carbon dioxide. Moreover, citizens can choose public transport or carpool together. Subsequently, recycling must also be encouraged. On the government's part, they must regulate industrial waste and ban them from emitting harmful gases in the air. Deforestation must be stopped immediately and planting of trees must be encouraged. Global warming is a global problem, and therefore, its solution also needs a global effort.

3. Read the following passage and answer the questions that follow :

Very often, we do not take the first step towards a good cause because we say to ourselves, "The task is so big. What can I do alone?" So nothing gets done. There is much talk about environmental protection, air pollution and saving our forests. Do we really care? If we do, here are a few things we can do to make our surroundings more pleasant.

It is good to adopt a two-uses-attitude! By putting an article to a second use, we are giving it a longer lease of life and using up less raw material from nature. One of the worst things we do is the abuse of paper. The clean sides of envelopes can be used to write small notes, lists and reminders around the house. The more paper we use, the more trees will have to be cut down. For the same reason, we should avoid the use of paper napkins or paper plates. Cloth napkins are just as good, for they can be washed and used over and over again.

Another area which needs the most urgent attention is effective garbage disposal. People who are conscious about it follow rules and laws strictly. As a result, their neighbourhoods are clean and beautiful. Similarly, each one of us can contribute to a cleaner environment. All kitchen waste should be collected separately. Those of you who have green fingers can turn this into valuable manure. Dig a pit and put the kitchen waste into it. When the pit is a little over half full, cover it up with mud. Let nature do the rest. Within three or six months, we will have a good garden manure. It can also be done as a community project by digging a large pit in the colony. Do take help of all the members, for nothing succeeds like cooperation.

A lot of people don't care about the environment because they don't understand the adverse effect that society has on it. It is important to convince people to care about the environment. The first step would be to convince people to change by providing simple alternative solutions and ways of doing things. The internet is a powerful tool and a group on social media of like-minded people can be formed. People can share environmental stories and issues, as well as pool in solutions and alternatives to educate one another.

With the current state that our planet is in, it is imperative that people actively care about the environment and most importantly to act now.

- (a) Comment on the writer's statement that 'we do not take the first step towards a good cause'. (4)
- (b) What can we do to avoid the abuse of paper? (*any two points*) (4)
- (c) What procedure can one adopt for kitchen waste? How long does it take to make good garden manure? (4)
- (d) How can making of garden manure be done as community project? (2)
- (e) Complete the given sentence appropriately. An effective garbage disposal ensures ____ (2)
- (f) List the ways in which the internet can be used towards the cause of the environment. (4)
